Sally Letson Symposium

42nd Annual Sally Letson Foundation Symposium

September 30–October 2, 2010

Westin Ottawa Hotel, Ottawa, Canada

The 2010 Symposium brings together a dynamic panel of international and local experts to review the latest in pediatric ophthalmology and ocular genetics. This interactive program will emphasize practical clinical points surrounding common conditions, and is designed for comprehensive ophthalmologists, post-graduate trainees, medical students, and ophthalmic allied health professionals.

At the end of this symposium, participants will be able to:

- Develop a clinical approach to common and important eye diseases of childhood.
- Apply current concepts to treat amblyopia, strabismus, and refractive error in children.
- Understand when and how genetics can be applied to clinical diagnosis in ophthalmology.
- Discuss how advances in genetics are changing therapeutics in ophthalmology.

CONTINUING PROFESSIONAL DEVELOPMENT

This event is an accredited group learning activity under Section 1, as defined by the Royal College of Physicians & Surgeons of Canada for the Maintenance of Certification program. Approved by the Canadian Ophthalmological Society for a maximum of 20 credits. Please claim only the number of hours attended.

Please note: This program is approved for CPD credits for physicians. Please check with your college or certifying body for your own certification guidelines.
