

Canadian Association of Pediatric Ophthalmologists

Association canadienne des ophtalmologistes pédiatriques

Objectives - Objectifs

Participants can increase

- knowledge of the indications and techniques for botulinum toxin injection in strabismus
- knowledge of the treatment of strabismus induced by retinal surgery
- ability to recognize and describe new diagnostic and treatment modalities in pediatric ophthalmology and strabismus

Les participants pourront :

- connaître davantage les indications et les techniques d'injection de toxine botulique pour traiter le strabisme,
- connaître davantage le traitement du strabisme induit par la chirurgie de la rétine,
- mieux reconnaître et décrire les nouveaux modes de diagnostic et de traitement du strabisme en ophtalmologie pédiatrique.

Pediatric ophthalmology & strabismus

Ophtalmologie pédiatrique et le strabisme

Saturday, June 14 | 0800-0930 | Frontenac C
Samedi 14 juin

Guest - Invité

John Lee, MA, DM

Moderator - Animateur

Patrick Hamel

0800	Welcome
0810	Review of the use of botulinum toxin in strabismus John Lee
0830	Discussion
0840	An investigation of the genetic causes of congenital stationary night blindness: correlating genetic mutational changes, clinical, and electrophysiological findings R. Brennan, R. Tobias, L. Leatherdale, N.T. Bech-Hansen, C.J. Lyons
0850	Discussion
0855	Relationship between feeding schedules and gastric distress during retinopathy of prematurity screening eye examinations Y. Ning, J. Strube, J. Bakal, B.W. Arthur
0905	Discussion
0910	Rapid measurement of corneal diameter in children in clinic using digital photography N. Puvanachandra, T. Pollock, C.J. Lyons
0920	Discussion
