

The Canadian Orthoptic Society La société canadienne d'orthoptique

Friday, June 13 | 0800-1700 | Empress C
Vendredi 13 juin

Objectives - Objectifs

Participants can increase knowledge

- related to the challenges of mixed types of amblyopia and its management
- regarding vision screening and visual development in children
- related to types of strabismus and their surgical treatment

Orthoptists will gain more insights into performing visual fields test and its application in patients with neurological and functional diseases.

Les participantes élargiront leurs connaissances des sujets suivants :

- les défis que posent l'amblyopie mixte et son traitement,
- l'examen et le développement de la vue chez les enfants,
- les types de strabisme et leur traitement chirurgical.

Les orthoptistes se familiariseront davantage avec le test du champ visuel et son application chez les patients atteints de maladies neurologiques et fonctionnelles.

Guests - Invités

G. Robert LaRoche, MD / John Lee, MA, DM

Moderator - Animateur

Charles Maxner
