The Royal College of Physicians and Surgeons of Canada, Region 3 Advisory Committee, has provided a continuing medical education grant in support of our meeting.

Learning Objectives

- To understand the science behind and clinical utility of treatments for macular degeneration, diabetic retinopathy and other major retinal disorders
- To interpret the results of established and novel retinal diagnostic tests such as optical coherence tomography, fluorescein angiography and electrophysiology for common retinal conditions
- To recognize important life or vision threatening retinal disorders and how they are managed to optimize outcomes
- To understand the indications, contraindications, and complications of retinal surgery for retinal detachment, diabetic retinopathy, ocular trauma, and vitreomacular diseases
- To be familiar with new and emerging treatments for the most common retinal conditions including macular degeneration and diabetic retinopathy
