

EyeWest Vision Associate Ophthalmologist

Role & Facility Information:

Join the North Shore's premier advanced eye care centre and build a thriving practice as an associate. Located in the heart of North Vancouver, British Columbia, we serve patients from across the North Shore, Sea to Sky corridor, and some of Burnaby and Vancouver.

Our established, high-volume clinic is seeking a **FRCS-Certified or FRCS-eligible Ophthalmologist** who prioritizes teamwork, and high quality, patient-centred care. Additional experience or interest in cosmetic/oculoplastics, cornea, glaucoma or adult strabismus an asset but not required. This is an outstanding opportunity for a motivated specialist to step into a well-supported, technologically advanced practice with immediate patient demand.

Our state-of-the-art diagnostic centre is fully equipped with Zeiss Optical Coherence Tomography (OCT) anterior and posterior segment imaging and OCT angiography, Optos, Wide Field Retinal Imaging and Fluorescein angiography (FA), Zeiss Humphrey Visual Fields, Zeiss Corneal Topography, Zeiss IOL Master and all cataract surgery pre-operative testing including Alcon Verion mapping onsite. Zeiss YAG, 532nm and Laser Indirect lasers as well as PDT and SLT lasers onsite. Immediate access to patient test results through IFA EMR, Optos and Zeiss Forum and our experienced clinical support staff allows our specialists to provide timely and comprehensive eye care. The practice also benefits from a well-established optometric referral network across the North Shore and Sea to Sky region.

Located just a block from Lions Gate Hospital, this position offers a unique opportunity to establish and grow a thriving ophthalmic practice in a supportive environment serving patients throughout the North Shore and Sea-to-Sky corridor (population ~250,000). In addition to joining the practice, Lions Gate Hospital currently has two surgical privilege opportunities available. This rare alignment of clinic and hospital proximity potentially enables you to build a high-demand surgical practice while providing patients with the convenience and continuity of receiving comprehensive care – all within the same two-block radius.

The North Shore Sea to Sky region with its temperate climate, natural beauty and abundance of available recreational activities is consistently rated as one of the best places to live in Canada. Skiing, sailing, hiking and biking are all available within minutes from the practice. The area is also well known for its waterfront parks, vibrant neighbourhoods, dynamic restaurant scene, safe communities, and excellent schools. This combination of professional opportunity and family-friendly living makes it an exceptional place to work and live.

Please note that hospital privileges are granted through a separate application and credentialing process with the Hospital. See Vancouver Coastal Health for more details.
