Subject: Locum Opportunity – Cornea and Anterior Segment

Dear Colleagues,

We are seeking a locum ophthalmologist with cornea subspecialty training to provide coverage in Oakville, Ontario from August 1, 2026 to July 31, 2027 (flexible).

This is a well-supported, mixed practice (surgical and medical cornea plus general ophthalmology) with excellent colleagues and a wonderful patient population.

Clinical & OR

- Clinic: 2–3 days per week, split between Oakville Trafalgar Memorial Hospital and Milton Eye Surgeons (community practice [Milton Eye Surgeons | Halton Retina Centre](#))
- OR: 3 OR days per month at Oakville Trafalgar Memorial Hospital
- Optional: access to private refractive surgery (if desired)

Team support

You will be supported by an outstanding team, including experienced technicians and a responsive reception staff.

Cornea / anterior segment resources

- Reliable access to corneal transplant tissue from the Toronto Eye Bank
- State-of-the-art OR equipment
- Anesthesia support available on request
- Dedicated cornea diagnostics including tomography, anterior segment OCT, and specular microscopy

General ophthalmology / cataract resources

- OCT-based biometry
- Lens counsellors
- State-of-the-art OR equipment
- Access to a large variety of lenses from different companies as options for patients

Call

General on-call expectations are approximately 1 in 6. Call is typically not very busy and covers the Halton Region.

Licensure requirement

Applicants must be eligible to obtain a CPSO Independent Practice license.
